

AFI Core Fixed Income

INVESTMENT PHILOSOPHY

Mesirow Analytic Fixed Income (“AFI”) believes that the role of fixed income is to provide principal preservation, income, and risk reduction through diversification. We believe that yield wins over time, but not all the time. Our rigorous research is designed to add value through sector allocation by identifying when we are being appropriately compensated for taking credit risk. The primary factors that drive security selection returns can be identified and managed. This enables us to own companies that we believe will outperform and avoid those that will underperform. Risk management is critical to success. Minimizing downside risk and avoiding permanent loss of principal are primary goals.

INVESTMENT PROCESS

We utilize a quantitative investment process with a qualitative overlay. The top-down aspect of our process determines where we are in the credit cycle to help guide our sector and quality decisions. Our bottom-up security selection ranking system identifies the factors that generate returns based on the current investing environment. Our belief is this system is more comprehensive, efficient, and systematic than a purely fundamental approach.

INVESTMENT OBJECTIVES AND ADVANTAGES

- Produce excess returns primarily through sector/quality allocation and security selection rather than a static overweight to risky positions.
- Research-oriented process identifies the investing regime and then orients portfolio holdings toward either valuation or fundamental factors.
- Returns are highly correlated to the overall bond market, but excess returns are generally lowly or negatively correlated to bond manager peers.

Mesirow Financial Investment Management Institutional Fixed Income claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Mesirow Financial Institutional Fixed Income has been independently verified for the periods 01.01.1996 – 12.31.2021. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Core Fixed Income Composite has had a performance examination for the periods 01.01.2007 -12.31.2021. The verification and performance examination reports are available upon request.

Benchmark returns are not covered by the report of independent verifiers.

Mesirow Financial Investment Management, Inc. ("MFIM") is an investment advisor registered with the Securities and Exchange Commission under the Investment Advisers Act of 1940. The "Entity" as shown represents Mesirow Financial Investment Management Equities and Fixed Income, which is comprised of the GIPS-compliant units of MFIM which specialize in managing portfolios for institutional clients adhering to an investment process geared towards institutional investors. The historical performance presented prior to the creation of the division was managed by MFIM or its predecessor firms prior to 01.01.2005. For purposes of claiming GIPS compliance, as of 01.01.2010, the "Firm" is further defined as the Fixed Income business unit, which manages portfolios primarily for institutional investors adhering to an investment process, incorporating fundamental analysis of security valuation factors and drivers. The composites within this business unit vary primarily by duration and the type of originator of the security. On 05.29.2020 MFIM Fixed Income completed the lift out of the Analytic Fixed Income Team from a former and unaffiliated registered Investment Advisor, Chicago Equity Partners (CEP) which its team, became an integral part of MFIM Fixed Institutional Fixed Income. On 05.29.2010, MFIM acquired the asset management rights for a portion of the managed portfolios from an independent investment advisory firm and retained all of the principals and employees related to such portfolios. Performance results of the Core Fixed Income Composite at the prior firm are the performance record of the Firm.

(1) Total Firm Assets are not presented for periods prior to 2019 because the Composite was not part of the Firm.

Performance and composite inception and creation date is 01.01.2007.

The Core Fixed Income Composite contains fully discretionary portfolios and for comparison purposes is measured against the Bloomberg U.S. Aggregate Index. The Core Fixed Income Composite expectations are as follows: tracking error 100-125 basis points, sales turnover 50-150% annually, and number of holdings ranging from 75-150. The minimum portfolio size for this composite \$1 million. The performance presented herein represents past performance and is no guarantee of future results. Performance reflect the reinvestment of income, expressed in U.S. dollars. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. The

composite policy requires the temporary removal of any portfolio incurring a client-initiated significant inflow or outflow of 10% of portfolio assets. The firm's list of composite descriptions, a list of pooled fund descriptions for limited distribution pooled funds, and a list of broad distribution pooled funds is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Calculation of Risk Measures: Annual / 3 Years Dispersion

Composite internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. Because it is not statistically meaningful, MFIM does not calculate the dispersion of annual returns for the years the composite held five or fewer accounts. Inclusion of the three-year annualized ex-post standard deviation of the composite and benchmark was added as a requirement effective 12.31.2011.

(2) Data are not presented for periods containing less than 36 monthly returns for the composite.

Performance / Net of Fee Disclosure

Net of fee performance is calculated using the actual monthly fee accrued to each account in the composite as of 06.01.2020. Prior to 06.01.2020, Net of fee performance use the composite fee schedule as follows: 0.25% on the first \$25 million, 0.20% on the next \$75 million, and 0.15% thereafter. Performance information that is provided gross of fees does not reflect the deduction of advisory fees. Client returns will be reduced by such fees and other expenses that may be incurred in the management of the account. Advisory fees are described in Part 2 of Form ADV of MFIM.

Investment Fee Disclosure

MFIM requests that any third party, including investment management consultants, provide our performance data only on a one-on-one basis. Performance results are presented before management and custodial fees. As described in Analytic Fixed Income Form ADV, Part 2, investment management fees for the Core Fixed Income Strategy are:

- 0.25% on the first \$25 million
- 0.20% on the next \$75 million
- 0.15% on the balance

An actual fee charged to an individual portfolio may vary by size and type of portfolio. Fees are collected quarterly, which produces a compounding effect on the total rate of return net of management fees. As an example, the effect of investment management fees on the total value of a client's portfolio assuming (a) quarterly fee assessment, (b) \$1,000,000 investment, (c) portfolio return+ of 8% a year, and (d) 1.00% annual investment advisory fee would be \$10,416 in the first year, and cumulative effects of \$59,816 over five years and \$143,430 over ten years. Actual investment advisory fees incurred by clients may vary.

GIPS REPORT – MFIM CORE FIXED INCOME COMPOSITE (CONTINUED)

Benchmark Definition

The Bloomberg U.S. Aggregate Index (formerly named Bloomberg Barclays U.S. Aggregate Index) represents securities that are SEC-registered and U.S. dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components for government and corporate securities, mortgage pass-through securities, and asset-backed securities. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. Indexes are unmanaged. It is not possible to invest directly in an index. Bloomberg® is a trademark and service mark of Bloomberg Finance L.P. Barclays® is a trademark and service mark of Barclays Bank Plc, used under license. Bloomberg Finance L.P. and its affiliates (collectively, "Bloomberg") or Bloomberg's licensors own all proprietary rights in the Bloomberg Barclays Indices.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.
