Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. Past performance is no guarantee of future results.

The performance date quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. Performance current to the most-recent month-end may be obtained at [mesirow.com/mutual-funds](https://www.mesirow.com/mutual-funds) or by calling 1.833.MESIROW.

There is a 1% redemption fee applicable if shares are redeemed within 90 days of purchase. Investment performance does not reflect the redemption fee; if it was reflected, the total return would be lower than shown.

Carefully consider the Funds' investment objective, risk factors, charges and expenses before investing. This and additional information can be found in the Funds' full & summary prospectus, which may be obtained at mesirov.com/mutual-funds or by calling 1.833.MESIROW. Read the prospectus before investing.

The Mesirow Funds are distributed by SEI Investments Distribution Co. (SIDCO). The Funds are managed by Mesirow Financial Investment Management, Inc. SIDCO is not affiliated with Mesirow Financial Investment Management, Inc. or Mesirow Financial, Inc.

The Bloomberg US Corporate High Yield Bond Index measures the USD-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below. Bonds from issuers with an emerging markets country of risk, based on Barclays EM country definition, are excluded.

Average effective duration provides a measure of the Fund's interest rate sensitivity—the longer a fund's duration, the more sensitive it is to shifts in interest rates. Average effective maturity is the weighted average of the maturities in a portfolio of bonds. The 30-day SEC Yield represents net investment income earned by a fund over a 30-day period, expressed as an annual percentage rate based on the fund's share price at the end of the 30-day period. Unsubsidized 30-day SEC Yield reflects what the yield would have been without the effect of waivers and/or reimbursements.

Risk Disclosure

Mutual fund investing involves risk, including the possible loss of principal. There is no guarantee the fund will achieve its stated objective. Bonds and bond funds are subject to interest rate risk and decline in value as interest rates rise. High yield bonds have greater risk of default or downgrade and are more volatile than investment grade bonds. Mortgage-backed securities (MBS) are subject to prepayment and extension risk. Small movements in interest rates may quickly and significantly reduce the value of certain MBS. The Fund may invest in derivatives. Changes in market value of fund securities and those securities related derivatives may not be proportionate. Derivatives are subject to illiquidity and counterparty risk. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. The fund's use of leverage may accelerate the velocity of potential losses. Investments in MLPs involve risks that differ from investments in common stock including risks related to limited control and limited rights to vote on matters affecting the MLP.
