

Important facts to know that impact your 2024 financial planning

Every year, a variety of governmental agencies and programs announce the annual contribution limits, tax rates and payment requirements. We have consolidated these for you to serve as a handy reference guide as you review your financial plan at least annually with your wealth advisor.

Important note: This 2024 data may change based on pending legislation. We will keep this document current as additional updates are required.

Headquartered in Chicago, with locations around the world, we serve clients through a personal, custom approach to reaching financial goals and acting as a force for social good. With capabilities spanning Global Investment Management, Capital Markets & Investment Banking, and Advisory Services, we invest in what matters: our clients, our communities and our culture. To learn more, visit mesirow.com and follow us on [LinkedIn](#).

Glossary

Catch up contribution: A catch-up contribution is a type of retirement savings contribution that allows people aged 50 or older to make additional contributions to 401(k) accounts and individual retirement accounts (IRAs). Catch-up contributions are larger than the standard contribution limit.

Contribution limit: The maximum amount a person can contribute to his or her retirement account is set each year by the IRS after taking inflation into account.

Defined benefit amount: Internal Revenue Code (IRC) Section 415(b) limits an individual's pension benefit amount. The IRC 415(b) limit affecting public employees is the Dollar Limit. The Dollar Limit for 2020 is \$230,000. Elective deferrals

FRA: Retirees can start receiving Social Security retirement benefits as early as age 62. However, retirees are entitled to full benefits when they reach their **full retirement age**.

Social Security wage base: Social Security's Old-Age, Survivors, and Disability Insurance (OASDI) program limits the amount of earnings subject to taxation for a given year. The same annual limit also applies when those earnings are used in a benefit computation. This limit changes each year with changes in the national average wage index. We call this annual limit the contribution and benefit base. This amount is also commonly referred to as the taxable maximum.
